

Website

This website is built using [Docusaurus](#), a modern static website generator.

Installation

Local Development

This command starts a local development server and opens up a browser window. Most changes are reflected live without having to restart the server.

Build

This command generates static content into the [build](#) directory and can be served using any static contents hosting service.

Deployment

Using SSH:

Not using SSH:

If you are using GitHub pages for hosting, this command is a convenient way to build the website and push to the [gh-pages](#) branch.
